-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-19 is/are pending in the application.

DETAILED ACTION

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 16-20 been renumbered 15-19.

2. Claims 1 and 8 are objected to because of the following informalities:

Claim 1 recites the limitation "said threaded neck" in line 9. There is insufficient antecedent basis for this limitation in the claim. Appropriate correction is required.

Claim 8 recites the limitation "said threaded neck" in line 11. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5, 8-11, 14 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,083,672 to Lewandowski.

Lewandowski shows a two piece closure device for container as seen in Figs. 1-4 having a container 54 with a surface 52 and proximate the container's neck, a generally flat gate valve

Art Unit: 3754

30 slideably positioned on a channel 13 and having a handle or retaining tabs 44, following the contour of the container in a acute angle as seen in Fig. 5, captive retainers 32 and 42, reversible couplings 19 and 20 with interior and exterior threads 18 and 22 respectively.

5. Claims 1-8 and 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by US 2,626,089 to E. J. Osfar.

Osfar shows a powder and granular material container with self-closing dispensing gate valve as seen in Figs. 1-5, having a biasing flat valve 15 attached to the neck 11 of a container 6.

6. Claims 1 and 3-7 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3,792,803 to Kessler.

Kessler shows a self-reclosing cap valve as seen in Figs. 1-4, a self closing flat valve 10 with biasing arms 12 mounted on the neck 2 of a container.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,083,672 to Lewandowski in view of US 2,626,089 to E. J. Osfar.

Lewandowski shows all claimed limitations as discussed above except for a biasing mean for the flat valve. Osfar shows a powder and granular material container with self-closing dispensing gate valve as seen in Figs. 1-5, having a biasing flat valve 15 attached to the neck 11 of a container 6. It would have been obvious to a person with ordinary skill in the art at the time

Art Unit: 3754

the invention was made to modify the device of Lewandowski to include a biasing member to maintained the valve closed as taught by Osfar to eliminate the need for the operator to manually closed the valve after dispensing form the container.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kaanehe shows a dry product dispenser. Chrisman shows a powder dispenser. Fannon shows a powder jack. Schaab shows a utensil. Lindgren shows a dredging can. Phillips shows a drain cock. Bond shows a finger actuated gate valve dispenser. Claus shows a slide valve. Markos shows a dispenser container for pourable contents.
